

## [FAIR Database](#)

Developing the website of FAIR is a continuous process, aiming at achieving the greatest possible exposure for delivering the message of FAIR and to serve as information source for attaining more dynamic cooperation and strategic alliances among its Members.

Recognizing that our industry, entirely, depends on data and statistics, which need to be placed in meaningful context and to be continually renewed, it is hoped that FAIR website will serve effectively the purpose of building up a database and exchanging the members' information to improve the understanding about each other markets.

The information of each FAIR Company Member will appear on FAIR website through the link "Directory", which will be easily opened to fill the required form, with the data of the Company Member.

All members will be able to edit their data themselves using their username and password. These data and information will be amended and updated only by the responsible Executive who will be entrusted to do so, in the Company.

FAIR members will use this additional media of publicity free of charge.■
